## Who We Are

Founded in 2018, Peregrine Technology Solutions is a minority, veteran owned small business. Amongst our Executive Team we have over 50 years of IT experience in both the private and public sectors. We consider ourselves a part of your IT team and act accordingly. Our mission is to provide our customers with secure and reliable technical solutions.

GSA Small Business

GSA Certified Small Disadvantaged Business

GSA Veteran Owned Small Business

Member of the US Small Business Chamber of Commerce

## Core Competencies

Our team of subject matter and IT solutions experts work closely with our customers to develop enterprise scale architecture and infrastructure solutions, with a focus on the following areas:

- **Cloud architecture and infrastructure design**
- **Network architecture and infrastructure design**
  - **Vendor agnostic architecture design**
  - **Enterprise scale systems design**
  - **System modeling**

## Past Performance

### **DISA DEOS**

Our team has provided the DEOS program key architectural design services, mobility infrastructure integration as well as Tier III/IV support and real time cloud infrastructure monitoring for both the IL5 and IL6 environments.

### **DISA DoDNet**

Our team provided the DoDNet program Virtual Machine architecture design and support.

## Differentiators

We treat everyone with respect. We go out of our way to help each other and support our customers. We are enthusiastic about technology, science and gadgets.

We keep up to date with technology through company funded training courses, everyday use and personal research.

We believe in building relationships with our customers and creating trust.

# Our Capabilities

## **Information Systems Engineering**

- Software/hardware integration
- Application testing (source code analysis, tool assisted code review)
- System/infrastructure performance analysis
- Network design and engineering
- Systems design and engineering
- Process automation
- Endpoint monitoring
- Technical documentation
- Cloud engineering
- Cloud architecture design

## **Program and Project Management**

- Project prioritization & tracking
- Project planning
- Personnel & task management
- Information & knowledge management

## **Mobility**

- Vendor agnostic end-point management & monitoring
- Mobile Device Management infrastructure design

## **Cyber Security/Information Assurance**

- Computer Network Defense (CND) & Blue Team
- Threat Intelligence & Analysis
- Assessment and Authorization (A&A)

## **Business Intelligence**

- Key Performance Indicator (KPI) generation & analysis
- Data forecasting/visualization
